DETAILED ACTION

This first Office Action is in response to Applicant's originally filed Amendment received in the Office on October 31, 2001 in this case.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear whether Applicant intends to claim the combination of the hanger and the surface or the subcombination of the hanger. Rejections below interpret claims 1 and 6 as claiming only the subcombination of the hanger. The examiner has interpreted claims 1 and 6 to not positively recite a surface, table or desk, as Applicant claims a hanger. Therefore, no weight has been given to the surface which the hanger is "configured" to be attached to. Correction or clarification is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Perrin et al. (5,758,853). Perrin et al. teach each feature of the claimed invention as shown below. Regarding claim 1, offset means "an abrupt bend in an object by which one part is turned aside out of line" (Merriam Webster's Collegiate Dictionary, 10th ed., Merriam-Webster, Inc., Springfield, Massachusetts, 1999). Each planar portion of Stratton is therefore offset from every other planar portion because none of them are in the same line even though two may be parallel. Regarding claims 2 and 7, Perrin et al. teach mounting screws (48). Regarding claims 3-4 and 8-9, Perrin et al.'s holder can be formed from sheet aluminum or plastic (See col. 4, Ins. 35-40). Regarding claims 5 and 10, no weight has been given to the surface, table or desk (See discussion above).

Prior Pertinent Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent No. '279 to George; '679 to Mitchell; and '358 to Stratton each teach hangers having offset planar sections.
